SUGARHOUSE BOILING RECORDS 20____

Barrel Inspection Process: Prior to filling, a flashlight is used to visually inspect the interior of all barrels for rust, flaking liner and/or miscellaneous debris. Any debris found is removed and barrels with rust or flaking liner are not used to package syrup. In addtion to the visual inspection, all barrels are evaluated for unsuitable odors. Completed inspection of barrels is indicated with a check mark in the 'Inspect?' column of these records.

BARREL SEQUENCE NUMBER	DATE	TIME	EMBOSSED BARREL NUMBER	INSPECT?	BARREL SIZE (GAL.)	BARREL TARE	GRADE	COMMENTS (ie: cleaned pan, blown paper, unfiltered or cloudy drum, off density, weather, other significant info)
