

## **Documentation on Chemicals, including Cleaners, Fuels and Pesticides**

The following policy specifies how {*Name of sugarhouse*} stores chemicals, including cleaners, fuels and pesticides.

All chemicals are stored in safe locations so children can't get into them and they will not contaminate syrup.

- ☐ Acid for pan washing is stored in its original container with the instructions in {*description of storage location*}.
- ☐ Diatomaceous Earth (DE) is stored in the original bag and stored in {*description of storage vessel*} with a cover.
- ☐ Unopened bags of DE are stored {*description of storage location*}.
- ☐ Chemicals used to clean the Reverse Osmosis (RO) machine are stored in their original containers with the instructions in {*description of storage location*}.
- ☐ All fuels are stored in the {*description of storage location*}.

Safety Data Sheets (SDS) are present for every chemical used in the facility. The Safety Data Sheets are filed in the notebook in {*description of storage location*}.
