

Policy for Disposing of Product that does not Meet Food Safety Standards

The following policy describes how *{Name of sugarhouse}* disposes of product that does not meet Food Safety Standards.

- Any maple syrup *{Name of sugarhouse}* produces that does not meet food safety standards is disposed of at the end of the season in *{describe location}*. This normally consists of near syrup that is the result of pushing permeate through the evaporator on the last day of the boiling season.
